

SITE SECURITY SOLUTIONS

Protecting your premises

A LEADING PROVIDER OF SITE SECURITY SOLUTIONS

As the leading rental company in the UK and Ireland, Sunbelt Rentals provide specialist, tailored security equipment and solutions to protect your premises.

Whether you are looking to secure a construction site, inner city renovation project or warehouse facility, we can supply and install a tailored solution to suit any location and any requirement. With same-day delivery available we can rapidly deploy a comprehensive range of products directly to your site, from fencing and barriers to temporary CCTV and site welfare and accommodation.

Our team of experts have decades of experience delivering tailored solutions across a range of sectors and industries, including commercial, retail, healthcare, education, aviation, government, logistics plus many more.

WORKING IN PARTNERSHIP WITH YOU

We understand the importance of working alongside you to develop the most effective, efficient and sustainable solution for your site.

1. Streamline your equipment supply chain

With the broadest self-delivered equipment portfolio within the hire industry, we can support you with driving operational efficiencies and streamlining your existing supply chain.

2. 360 Solutions

Our 360 Solutions team bring together our specialist equipment with a unique set of project management skills to define, design and deliver your project, bespoke to you.

3. Single point of contact

Seeking out the right person to solve your problem can be frustrating. With our dedicated hire desk acting as your single point of contact, we keep things simple and efficient.

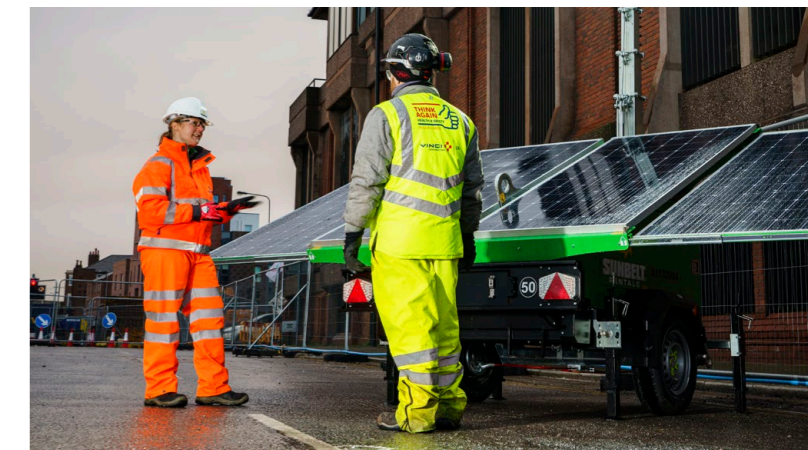

4. Dedicated account management

With a dedicated account manager you can be sure you'll have someone looking after you who understands your challenges and what is important to you.

5. Driving a sustainable future

We continue to invest in the greenest equipment and solutions to drive carbon emissions down. We're leading the way in ESG doing the right thing by our customers, communities and the planet.

SUNBELT RENTALS INSURANCE

When you're hiring equipment, it's critical that you have insurance in place to provide adequate cover against loss, theft or damage.

Sunbelt Rentals Insurance is specially designed for the hire industry and covers any equipment you have on hire from us whilst it is on your site, giving you one less thing to worry about.

Scan here for more information

STRATEGIC PARTNER SERVICES

Through our exclusive strategic partnerships we're able to deliver non-core services, managed by our 360 Solutions team to protect quality output.

These include:

- Security and stewarding
- Security dog handling (NASDU Level 3)
- Reception and concierge
- Cleaning
- Temporary structures
- Casual and general labour
- Pest control
- Waste management, landscaping and grounds maintenance

Contact the team to find out more about how these services can be built into a tailored solution to help protect your sites.

PERIMETER PROTECTION

Your boundary is the first line of defence and should always be protected.

Fencing & Barriers

Something as simple as a fence around the perimeter of your site can be enough to deter unauthorised personnel from entering. We supply a wide variety of fencing and barrier systems for a range of applications, with a free site survey to provide a calculated solution.

Our range includes:

Police barriers

Pedestrian and crowd control barriers

Fortress fencing

Mesh fencing

Storm-Fence

Acoustic barriers

Anti-climb and anti-tamper options

Concrete Barriers

Concrete barriers are a highly durable temporary, or long-term solution, for preventing unwanted vehicular access to your site, preventing fly tipping or creating barriers for crowd control. With rapid deployment and fork lift pockets for easy placement, we can help protect your site from the time consuming and expensive process of removing people or waste.

Perimeter Intruder Detection (PID systems)

If you're concerned about break-ins on remote or unmanned sites Perimeter Intruder Detection (PID) systems are one of the top crime deterrents across the UK and provide a cost-effective security solution versus traditional man guards. Ready for instant deployment with a four-year battery life they are an effective and reliable asset protection solution.

Vehicle Barriers (Swinging Arms)

Vehicle barriers, or swinging arm barriers, provide a temporary solution for controlling access to sites under construction, or in the event that the main access control system malfunctions. They can be remotely controlled to let authorised personnel enter and act as a deterrent to prevent others from trying to gain access to a site.

If you need additional support on site, we can supply security guards through our 360 Solutions team. Ask your Sunbelt Rentals representative for more details.

LIGHTING

Powerful and portable lighting solutions are ideal for illuminating areas on site where there is no, or insufficient, natural light.

Our range extends from smaller lighting products such as festoon lights, fluorescent lights and tripod lights to the very latest tower lights suitable for larger sites, roadside lighting or use at events.

Our fleet includes some of the most environmentally advanced and quietest tower lights currently available, which offer a multitude of eco-friendly features and are economic to run with no need for refuelling for several days.

SOME OF THE MOST

COMMUNICATIONS

Communication is vital to keeping your premises, people and assets secure.

Whether it is your team being able to keep in touch with each other as they move around site, or being able to access systems securely, having reliable and durable communication equipment is an essential part of your overall security solution.

Temporary CCTV

CCTV systems are still one of the most effective deterrents against crime, including theft, vandalism and trespassing. CCTV systems offer the perfect compromise between vigilance in safety, security, peace-of-mind and cost.

The main areas for CCTV coverage are entrances, offices and locations with little natural surveillance. We can rapidly deploy temporary CCTV solutions that are vandal resistant and positioned strategically to avoid tampering.

Radios

Licensed hand-held radios are an essential part of your security teams armour.

From simple, cost-effective devices through to more complex solutions with GPS tracking, we have a wide variety of radios built to withstand the rigours of daily use. With industry-leading safety features incorporated into many of the devices, such as lone-worker and emergency buttons.

Temporary WI-FI

With so many communication and site management services now being online, a strong and stable internet connection is a vital part of any site security solution. It is not always possible, or cost-effective, to have a permanent internet connection.

Our temporary WI-FI routers are perfect for areas with no landline service and remote ventures. They allow multiple users to connect to the web, and with unlimited monthly data and stress-free installation you can be sure of instant and uninterrupted connection, wherever you are.

Body Cameras

Body cameras act as both a deterrent and recording device, and have been proven to improve safety, confidence and accountability in a variety of confrontational or security roles. They can also provide a source of evidence if needed.

Our body cameras are comfortable and easy for your team to wear, offering crystal clear picture quality and time, date and GPS stamping.

COMMUNICATIONS SUPPORT UNIT

Our Communications Support Unit is ideal for larger sites which require a one-stop-shop for all of your communication needs.

The Communications Support Unit can be tailored to meet your requirements and comes with welfare facilities and the latest equipment, as well as medium and large screens for displaying critical information and communicating important messages.

The units are supplied with an onboard generator enabling them to work off grid, so you don't need to worry about a power source or loss of connection interrupting your project. For improved safety we also supply an onboard defibrillator, first aid facilities and eye wash station to ensure you can respond quickly to any situations, protecting you and your team.

Equipment allocation process

Our bespoke equipment allocation process has proven to significantly reduce missing equipment, with many customers reporting no losses following projects. No more pen and paper, our system is all computerised so you have access to it at any time and can look back over records when needed. Data is saved locally to avoid any issues with lost network connections.

ACCESS CONTROL SOLUTIONS

15

Controlling who has access to your site, and when, improves your site security and will help to reduce the risk of unlawful entry and theft.

We stock a range of traditional half height and full height turnstiles that can be integrated into your fence line to create a complete barrier, providing the only access point. Our turnstiles help to control the flow of traffic both in and out of site and can be supplied with personnel badges and portable muster points, with badge readers, to track all entry and exit for safety and performance purposes.

Touchless Access Control

InteliPod, the world's first patent protected, 100% touchless and self-contained access control unit is designed for smarter, faster and safer site access. InteliPod combines efficient site access, CO2 reporting and anti-contamination technology with best in time and attendance monitoring features.

It also provides customisable access options to avoid delays with authorised people getting on site, from temporary access for visitors to multi-site access for those who need it.

ON-SITE WELFARE & ACCOMMODATION

Government guidelines specify that employers must provide adequate welfare facilities and a working environment that is healthy and safe for everyone in the workplace.

That can be challenging in more remote areas or on sites that are under construction. We provide a full range of well-equipped welfare and accommodation facilities to create not only a safe environment, but a comfortable one as well.

Static Facilities

Suitable for accommodating between 6 and 12 people, these welfare units are ideal for contractors working on-site, incorporating office space and welfare areas.

Available in a standard and eco specification, they have anti-vandal features which include steel personnel double locking door systems and internally secured steel window shutters.

Mobile and Towable Facilities

Towable welfare units offer a lightweight and compact mobile alternative that meet HSE requirements and provide all your on-site needs in one small package.

These units are suitable for accommodating up to six people and provide a pleasant and safe working environment. They are easily towed with one man operation and can be secured and manoeuvred on site in less than 3 minutes.

Site Storage

Protect your tools and equipment from theft and vandalism using our secure site storage. We have a range of security stores and storage containers available in different sizes to suit your requirements. Our security stores are available from 10ft by 8ft up to 32ft by 10ft.

We provide a FULL RANGE of well-equipped

welfare and accommodation facilities

TRAFFIC MANAGEMENT

Traffic management systems are an essential part of creating a safe environment for workers and the general public.

They help control the flow of both pedestrian and vehicle traffic and can also be used to display important messages around site.

With the largest and most modern hire fleet in the industry, we supply everything you need for your traffic management project. We can offer you much more than just equipment, providing you with a total traffic control and management service to deliver every aspect from start to finish - from site survey, design, liaison with utilities and local authorities right through to deploying your solution on site.

Our range includes:

Temporary traffic lights

Pedestrian and vehicle crossing

Variable message signage

Local authority applications

Chapter 8 registered class 1 & 2 road signs

Surveys and drawings

Concerned about speeding on site?

We can supply radar speed guns to help enforce speed limits.

Hire online today

FIRST AID TRAINING

In addition to our range of hire equipment we're also able to provide Ofqual regulated first aid training, with a formal assessment process for quality assurance.

Delivering first aid in the event of an incident can be the difference between life and death. Equipping your employees with training can give them the skills and confidence to respond quickly and appropriately.

We currently provide:

- Level 3 First Aid at Work
- Level 3 Emergency First Aid at Work
- Level 3 Administering Medical Gases
- Level 2 Basic CPR and AED Use

Our courses can be delivered at one of our industry-leading training facilities, or our experts can come to you.

Award-winning local plant maintenance apprentice, Lucy O'Rourke

DOING THE RIGHT THING

Helping create a sustainable future for all

At Sunbelt Rentals, we are totally committed to acting responsibly and sustainably.

It's in our DNA; so much so that 'being responsible' is one of our core values. Everything we do is the right thing for our people, for you, for our communities and our planet.

Our 10-year sustainability strategy is called 'Towards a low carbon and sustainable future'. We are working hard to reduce our environmental impact, and that of our customers, across three key areas:

- Environment
- Governance
- Social – people & communities

DID YOU KNOW YOU CAN BUY AS WELL AS HIRE FROM US?

Who better to buy from than the experts you hire from? Our wide range of quality equipment, tools, fuels and gasses has been handpicked, tested and approved by our sector product specialists.

You can choose from all the leading brands and order from thousands of stock items, with next day delivery to your site.

Consolidate suppliers and deliveries

Why give yourself the hassle and headache of dealing with multiple suppliers when we do it all? You can even consolidate your deliveries to save time, resource and fuel emissions.

We buy big so you could save big

Whether we're buying for hire or sale, we have great relationships with manufacturers, meaning you'll save by buying from us.

Fast delivery

Order from thousands of stock items with next day delivery, direct to your site.

Widest product range

Whatever the product, you can choose from a wide range of equipment, tools, fuels and gasses.

Chosen by experts

We only sell what our experts recommend, so you can be assured of top brand quality and sector suitability.

Full warranties

Everything we sell is covered by a full manufacturer's warranty, giving you lasting peace of mind.

Dedicated Product Sales Support Desk

Buy all your equipment, tools, fuels and gasses, with support from our highly experienced dedicated Sales Teams.
