Your Trusted Partner for Workforce Training and Competence

Choosing the right training provider is about more than simply achieving a qualification. It's about finding a partner who can help your organisation develop a safer, more skilled, and more productive workforce while making the entire training process simple and efficient.

At Sunbelt Rentals, we combine industry-leading expertise, nationwide coverage, and innovative digital solutions to deliver a seamless customer experience. Our online booking platform provides real-time course availability, instant access to scheduled courses across our national network of training centres, and flexible payment options including online card payments and purchase orders. This reduces administration, improves visibility, and gives customers complete control over their training requirements from booking through to certification.

With a comprehensive portfolio of accredited training courses delivered by experienced instructors, we support organisations across construction, infrastructure, utilities, industrial, facilities management, and many other sectors.

Whether training is required at one of our purpose-built training centres, on customer premises, or through dedicated mobile training solutions, our flexible approach ensures you can access the right training, in the right location, at the right time.

Investing in training is one of the most effective ways to improve safety, increase productivity, and ensure compliance throughout your workforce. Through practical, engaging learning and industry-recognised qualifications, Sunbelt Rentals helps organisations reduce risk, improve operational performance, strengthen safety culture, and maintain workforce competence in an ever-changing workplace environment.

Why Choose Sunbelt Rentals Training?

- Digital booking platform with real-time course availability
- Easy online payment and purchase order facilities
- National network of training centres across the UK
- Flexible delivery at customer sites and training centres
- Industry-recognised accredited qualifications
- Experienced instructors with real-world expertise
- Comprehensive range of technical, plant, access and safety courses
- Dedicated support from enquiry through to certification
- Improved compliance, safety and workforce productivity
- A trusted partner committed to developing competent, confident and job-ready employees

Working at Height

Working at height remains one of the leading causes of workplace injuries and fatalities. Ensuring employees have the right training, knowledge, and equipment is essential to reducing risk, protecting personnel, and meeting legal responsibilities.

Sunbelt Rentals delivers a comprehensive range of accredited working-at-height training programmes designed to develop competence, improve safety performance, and ensure compliance with current legislation and industry best practice. Whether your workforce uses ladders, mobile access towers, or powered access equipment, our experienced instructors provide practical, hands-on training that helps employees work confidently and safely in real-world environments.

Training can be delivered at your premises, online where appropriate, or through our nationwide network of specialist training centres.

IPAF Powered Access Training

As a leading IPAF training provider, we offer the full range of powered access qualifications, supporting operators, supervisors, managers, and instructors.

Courses include:

- Low-Level Access
- PAV (Push Around Vertical)
- 3A Mobile Vertical
- 3B Mobile Boom
- 1B Static Boom
- PAL+ Advanced Operator
- Hoist Training (GH, PH & TPH)
- Load and Unload
- MEWP for Managers
- Site Assessment and Survey
- CAP (Competent Assessed Person)
- IPAF Instructor Programmes

Benefits of IPAF Training

IPAF training helps organisations improve safety, compliance, and operational performance by ensuring operators have the skills and knowledge to use powered access equipment safely and effectively.

Properly trained operators are more confident in their abilities, reducing the likelihood of equipment misuse, accidents, and costly downtime. Accredited IPAF qualifications demonstrate operator competence, support compliance with legal and industry requirements, and provide assurance to clients and contractors that work is being carried out by qualified personnel.

Ultimately, investing in IPAF training can enhance productivity, maximise equipment utilisation, and contribute to a safer and more efficient working environment.

Approved Training Centre

PASMA Mobile Access Tower Training

Our PASMA programmes cover everything from low-level podiums to advanced tower configurations, ensuring delegates can safely assemble, inspect, alter, move, and dismantle tower systems.

Courses include:

- Low-Level Access
- Towers for Users (3T & AGR)
- Work at Height (novice)
- Towers for Managers

Advanced modules:

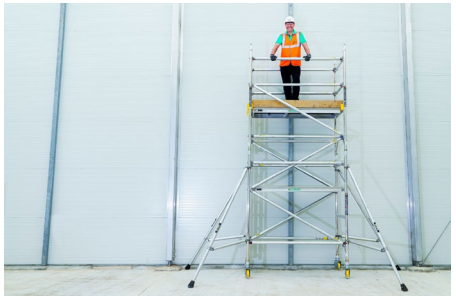

- Towers on Stairs
- Cantilever Towers
- Bridging Units

Benefits of PASMA Training

PASMA training helps organisations reduce the risk of accidents and falls associated with the assembly, inspection, and use of mobile access towers. By developing workforce competence and ensuring operatives understand safe working methods, organisations can improve compliance with industry standards and work-at-height regulations.

Training also promotes effective inspection and maintenance practices, helping to identify defects before they become safety issues. As a result, businesses benefit from safer worksites, increased operator confidence, improved productivity, and greater efficiency through the correct selection, erection, and use of tower systems.

PASMA

Ladder Association Training

Ideal for facilities management teams, maintenance engineers, technicians, and mobile workers who regularly use ladders and stepladders as part of their daily activities.

Training covers:

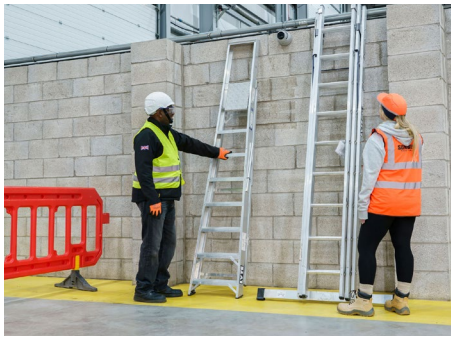

- Ladder & Steps (User)
- Ladder & Steps (Inspector)
- Ladder & Stepladder Managers Course
- Steps & Stool (User& Inspector)

Benefits of Ladder Association Training

Ladder Association training helps organisations reduce the risk of falls and injuries associated with ladder and stepladder use by ensuring employees understand how to select, inspect, and use access equipment safely. By promoting best practice and improving awareness of common hazards, delegates gain the confidence to carry out short-duration work at height safely and effectively.

The training also supports better equipment management and inspection processes, helping organisations maintain compliance with work-at-height regulations and ensuring ladders remain fit for purpose. The result is a safer workforce, reduced incidents, and improved operational efficiency when carrying out everyday access tasks.

the LADDER ASSOCIATION

Height Safety & Specialist Access Training

Through our specialist height safety partnerships, Sunbelt Rentals delivers advanced training solutions for individuals working in complex or high-risk environments.

Specialist Training Areas

- Work at Height
- Rope Access (IRATA Levels 1–3)
- Lifting, Rigging and Load Control
- Height Safety Equipment Inspection
- Rescue Training
- Rooftop Safety and Work Restraint Systems

These specialist programmes provide delegates with the skills needed to safely access, inspect, maintain, and work within challenging environments while ensuring compliance with relevant legislation and industry standards.

Benefits of Height Safety Training

Height safety training helps organisations reduce the risk of falls, serious injuries, and potentially life-changing incidents by ensuring employees have the knowledge, skills, and confidence to work safely in high-risk environments. By developing workforce competence in areas such as fall protection, equipment inspection, rescue procedures, and safe systems of work, organisations can demonstrate compliance with work-at-height legislation and industry best practice.

The training also strengthens emergency preparedness, enabling personnel to respond effectively should an incident occur, while supporting safer planning, supervision, and execution of high-risk activities. Ultimately, investing in height safety training helps protect employees, contractors, and business operations, reducing downtime, improving safety performance, and fostering a positive safety culture across the organisation.

Whether delivered on-site, at one of our specialist centres, or through bespoke customer programmes, our training helps organisations create safer workplaces, develop competent personnel, and maintain operational excellence.

Confined Space Training

Working in confined spaces presents serious hazards and requires specialist knowledge to ensure safe operations.

Our accredited confined space training courses cover everything from basic entry procedures to advanced rescue techniques across low, medium, and high-risk environments. Designed for operatives, supervisors, and rescue personnel, our programmes provide the practical skills, knowledge, and confidence needed to work safely in restricted spaces.

Equip your team with the competence and equipment awareness required to identify risks, comply with safety regulations, and respond effectively in emergency situations. With expert-led training, you can help create a safer working environment while maintaining operational efficiency.

Training can be delivered at one of our dedicated, specialist-equipped training centres or at your premises using our specially designed mobile training unit, providing a flexible solution to meet your operational requirements.

City & Guilds 6160 Qualifications & Specialist Training

If you require City & Guilds 6160 qualifications, we are one of the few providers able to deliver the full range of modules, from Basic Entry through to Medium and High-Risk Confined Space Operations, Rescue, Supervisory, and Management-level training. This enables us to provide a complete training pathway tailored to the needs of your organisation and workforce.

Alongside our accredited confined space programmes, we offer a range of specialist training courses, including:

- Gas Detection
- Use of Breathing Apparatus (BA)
- BA Trailer Training
- Bespoke training programmes for specialist rescue teams and support personnel

Our experienced instructors work closely with clients to develop practical, industry-relevant training that equips delegates with the skills, confidence, and competence required to operate safely and effectively in challenging confined space environments.

Whether you are looking to upskill individual operatives or implement a comprehensive confined space training programme across your organisation, we can deliver the expertise, qualifications, and support needed to meet your requirements.

City & Guilds
APPROVED CENTRE

LANTRA, NRSWA Street Works, Signing, Lighting & Guarding

Sunbelt Rentals delivers accredited NRSWA (New Roads and Street Works Act) training for operatives and supervisors working on or near the highway.

Our courses provide the knowledge and practical skills required to carry out street works safely, legally and efficiently.

Courses available:

- Signing, Lighting & Guarding (Unit 01)
- NRSWA Operative Qualifications
- NRSWA Supervisor Qualifications
- LANTRA 12A, B, C & D

Key learning outcomes

Delegates will develop an understanding of street works legislation and compliance requirements, safe site setup and management, and the correct use of traffic signs, barriers, and guarding systems. The course also covers public and workforce safety, hazard identification, risk control measures, and industry best practice for working on the highway network.

Who should attend?

This course is designed for traffic management operatives, highways and civils teams, telecommunications engineers, groundworkers, site supervisors, and contractors working within the public highway environment. It is suitable for anyone responsible for carrying out, supervising, or managing street works activities in accordance with NRSWA requirements.

Benefits

By attending this course, delegates can achieve industry-recognised NRSWA qualifications delivered by experienced, operationally focused instructors. Training is available at nationwide locations with flexible delivery options, helping organisations improve workforce competence, enhance safety standards, and meet legal and contractual obligations.

Professional Cleaning Training

Sunbelt Rentals provides practical, industry-focused cleaning training designed to improve operator safety, equipment efficiency, and cleaning standards.

Whether you are operating traditional cleaning equipment, ride-on scrubber dryers, or the latest robotic cleaning technology, our experienced instructors can develop the skills and confidence needed to maximise productivity and achieve consistent results.

Who should attend?

This training is suitable for facilities management teams, cleaning operatives, supervisors, contract cleaning businesses, healthcare estates teams, education providers, transport operators, and anyone responsible for operating or overseeing commercial cleaning equipment.

Training available

Our training programmes include BICSc-aligned cleaning principles, safe operation of ride-on scrubber dryers, walk-behind cleaning equipment, robotic cleaning systems, battery management, daily inspections, fault reporting, maintenance checks, and safe working practices. Delegates learn how to optimise cleaning performance while reducing downtime and equipment damage.

Benefits

By attending this training, organisations can improve cleaning standards, increase operator competence, enhance health and safety compliance, reduce equipment misuse, and maximise the return on investment from cleaning assets. Training can also support sustainability initiatives through more efficient use of water, chemicals, and energy.

Bespoke training packages

Sunbelt Rentals Training can design bespoke training solutions tailored to your organisation's specific equipment, operating environment, and workforce requirements. Whether training is required for a single site or a national contract, we can develop programmes covering induction training, refresher training, supervisor development, equipment familiarisation, and robotic cleaning implementation.

Workplace Safety

A strong workplace safety culture starts with ensuring employees have the knowledge and awareness to recognise hazards, manage risks, and work safely.

Effective health and safety training not only helps organisations meet their legal obligations but also reduces incidents, protects employees, and promotes a positive working environment.

At Sunbelt Rentals, we offer a comprehensive range of workplace safety training programmes designed to support organisations across all sectors. Whether your employees are office-based, site-based, or work across multiple environments, our courses provide practical knowledge and guidance to help maintain safe, healthy, and compliant workplaces.

Essential Health and Safety Training

Our workplace safety portfolio covers a broad range of subjects, including:

- Health and Safety Awareness
- First Aid
- Risk Assessment
- COSHH (Control of Substances Hazardous to Health)
- Manual Handling
- Workplace Hazard Identification
- Fire Safety Awareness
- Fire Warden
- Supervisor and Manager Safety Responsibilities
- Electrical Awareness and PAT Testing

These courses provide delegates with a clear understanding of workplace hazards, control measures, and their responsibilities in maintaining a safe working environment.

fit2fit ACCREDITED RPE Fit Test Provider

Respiratory Protection and Face Fit Testing

To further support workplace safety and compliance, Sunbelt Rentals delivers Fit2Fit-accredited face fit testing programmes and respiratory protection training. These services help organisations ensure that respiratory protective equipment (RPE) is selected, fitted, and used correctly.

Training and testing can be delivered:

- On-site using our mobile training and testing units
- At one of our national training centres
- As part of wider workplace safety programmes

This flexible approach helps organisations manage risks associated with dust, silica, asbestos, and other airborne contaminants while meeting their legal obligations and support customers to qualify and undertake FIT2FIT Approved Training in the Qualitative Face Fit Testing Method and FIT2FIT Approved Training in the Quantitative (APC) Face Fit Testing Method.

Construction Training

Developing a competent, safety-conscious workforce is fundamental to maintaining safe, efficient, and compliant construction sites.

At Sunbelt Rentals, we provide a comprehensive range of construction skills and plant training programmes designed to equip delegates with the knowledge, practical ability, and recognised qualifications required across the construction industry.

Construction Skills

Our construction skills training focuses on the core safety and technical competencies required for site-based personnel. These courses help reduce workplace incidents, improve operational efficiency, and ensure employees understand their responsibilities in maintaining safe working practices.

Training includes:

- Abrasive Wheels
- Fire Safety Awareness
- Hot Works
- Health and Safety Awareness
- Risk Assessment
- Method Statements
- Plant and Equipment Safety
- Construction Tools & Equipment

The use of this equipment often introduces additional workplace hazards, including exposure to dust, respirable crystalline silica (RCS), noise, vibration, hazardous substances, and, in some environments, asbestos-containing materials.

Our courses help delegates understand these risks and implement effective control measures to protect themselves and others.

Construction Plant

Safe and efficient plant operation is critical to site productivity, safety, and compliance. Our construction plant training covers a wide range of machinery and equipment used throughout the construction, infrastructure, and utilities sectors.

Courses are available for:

- Excavators
- Dumpers
- Telehandlers
- Rollers
- Loading Shovels
- Slinger Signallers
- Ride-on and Pedestrian Plant

Specialist Plant and Site Equipment

We deliver both CPCS, NPORS, AITT accredited training programmes, providing operators with industry-recognised qualifications that demonstrate competence and support access to construction projects across the UK.

Whether training new operators, refreshing existing skills, or supporting workforce compliance requirements, Sunbelt Rentals offers flexible training solutions delivered at customer sites or through our nationwide network of training centres, helping organisations maintain safe, skilled, and productive operations.

CITB Site Safety Plus

The CITB Site Safety Plus programme delivers nationally recognised health and safety training for construction workers, supervisors, managers, and directors. Covering courses such as HSA, SSSTS, SMSTS, Temporary Works, and Directors' Health & Safety, these qualifications develop safety awareness, leadership skills, and legal compliance across all levels of the workforce.

Designed to improve competence and reduce workplace incidents, CITB Site Safety Plus training helps organisations create safer sites, meet contractor and client requirements, and demonstrate a commitment to industry best practice through widely recognised CITB certification.

citb

Survey & Utilities Training

Sunbelt Rentals delivers a comprehensive range of Survey and Utilities training programmes designed to support the safe, compliant, and efficient delivery of infrastructure, utilities, construction, and civil engineering projects.

Our training develops the practical skills, technical knowledge, and accredited competencies required by surveyors, utility operatives, supervisors, and managers working in demanding operational environments.

Utility Safety Training

Our utilities training supports organisations working across highways, utility networks, telecommunications, and infrastructure projects, helping personnel meet industry standards and legislative requirements.

Training includes:

- EUSR SHEA Utilities
- EUSR Category 1 & Category 2 (CAT1 & CAT2) Utility Qualifications
- Signing, Lighting and Guarding
- Location and Avoidance of Underground Services (CAT & Genny)
- Safe Excavation Practices
- Service Detection and Mapping
- Reinstatement and Inspection
- Street Works Supervisor Training
- Electro fusion Welding
- Butt Fusion Welding

Our EUSR Category 1 and Category 2 programmes provide utility operatives with the essential knowledge and practical skills required to work safely around utility assets, undertake excavation activities, and support compliance with industry and client requirements.

Survey Equipment Training

To maximise productivity, accuracy, and equipment utilisation, we deliver training across a wide range of survey technologies and positioning systems.

Courses include:

- Total Stations
- GNSS/GPS Survey Equipment
- Laser Levels
- Digital Levels
- Utility Detection Equipment
- Ground Penetrating Radar (GPR)
- Topographical Survey Equipment
- Data Collection and Processing Software

Training is suitable for both novice and experienced users, helping delegates achieve greater accuracy and confidence when collecting and managing site data.

Benefits of Survey & Utilities Training

Investing in survey and utilities training helps organisations develop a more competent, confident, and safety-conscious workforce while reducing both operational and project risks. By ensuring personnel are trained in utility detection, surveying technologies, excavation safety, and industry best practices, businesses can significantly reduce the likelihood of underground utility strikes, minimise costly repairs and project delays, and improve overall site safety.

Training also supports compliance with utility sector standards, street works legislation, and health and safety requirements, while enhancing survey accuracy, data quality, and the effective use of specialist equipment. Ultimately, a well-trained workforce is better equipped to deliver projects safely, efficiently, and to the high standards expected by clients, framework providers, and principal contractors.

EUSR | Approved Provider

Supporting Safe & Efficient Infrastructure Projects

Whether you are carrying out utility detection, highway maintenance, topographical surveys, excavation works, or major infrastructure projects, our Survey and Utilities training programmes help ensure work is completed safely, efficiently, and in accordance with industry best practice.

Delivered by experienced instructors and supported by industry-leading equipment, our training helps organisations build competent teams, maintain compliance, and successfully deliver projects across the utilities and infrastructure sectors.

Building a Positive Safety Culture

Workplace safety is about more than compliance, it is about creating a culture where everyone takes responsibility for health and safety. Our training encourages employees at all levels to understand their role in preventing incidents, reporting hazards, and promoting safe working practices.

By investing in professional workplace safety training, organisations can:

- Reduce workplace accidents and injuries
- Improve employee wellbeing
- Increase safety awareness and engagement
- Support legal and regulatory compliance
- Enhance operational efficiency
- Demonstrate a commitment to employee welfare

With experienced instructors, flexible delivery options, and nationwide training facilities, Sunbelt Rentals provides workplace safety training solutions that help organisations create safer, healthier, and more productive working environments.

CITB Funding Changes from January 2026

From 8 January 2026, CITB changed the way most training courses are funded. Instead of claiming grants after training, employers now access funding through their local Employer Network (EN).

This change has been introduced to make CITB funding more sustainable and support the industry's future skills needs.

What Has Changed?

- Most short courses are no longer funded through the traditional CITB Grants Scheme.
- Employers now need to access funding through their local Employer Network.
- CITB typically contributes up to 50% of eligible training costs.
- Some specialist areas, including certain plant and scaffolding courses, continue to receive grant support through existing routes.
- Site Safety Plus courses such as SMSTS and SSSTS remain supported but at lower funding levels than previously available.

Other Key Changes

- First Aid training is no longer CITB funded.
- Attendance grants for long qualifications have been removed.
- Non-apprenticeship achievement grants have been standardised at £600.
- Level 7 qualifications are no longer eligible for CITB funding.

Large Employers

From 1 April 2026, employers with 250+ employees moved to a separate CITB funding programme and can no longer access Employer Network funding.

What Does This Mean for Employers?

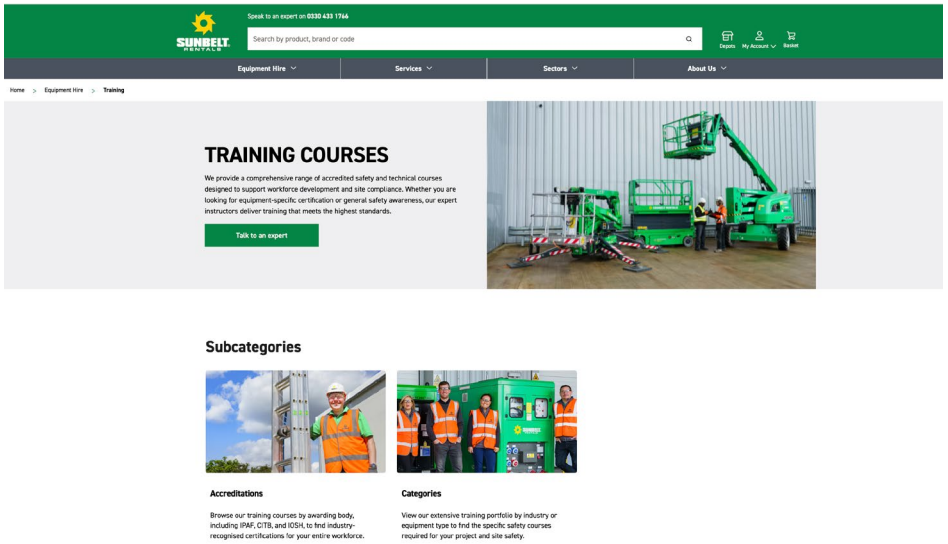

The focus has shifted from claiming grants after training to planning training in advance with your local CITB Adviser or Employer Network.

Engaging early helps secure available funding and ensures your workforce continues to receive the training needed to maintain competence, compliance, and productivity.

Sunbelt Rentals can support you through the new funding process, helping you maximise available CITB funding while planning and delivering your training requirements.

How to book training

Booking training with Sunbelt Rentals couldn't be easier.

Book Online

Browse our live course schedule, check availability, and book your place online 24/7. Courses can be booked and paid for securely by credit/debit card or charged directly to your Sunbelt Rentals account.

Speak to Our Training Team

Need advice on the right course or accreditation?

Our training specialists can help you identify the most suitable training for your employees and business requirements.
