

PRODUCT INFORMATION

Sabre-X

Benefits:

- Outstanding compressive strength - more than 415 tonnes/m² (605 psi) without deformation or breakage
- Ideal for heavy loads in difficult site conditions
- Each mat has two different traction surfaces
- Foam filled core prevents water ingress if mat is punctured -no cross contamination and no additional weight
- Chemically inert
- Operating temperature range -40°C to +80°C

Specification:

Actual size	4.0m x 2.0m	8.0 sq metres
Usable when installed	3.8m x 1.8m	6.8 sq metres
Height / depth	Total 102mm / core 94mm	
Weight (kg)	360	
Units per artic load	60	

Key Information & Features:

- Compression moulded
- High performance thermoplastic material
- Robust, durable, high-performance mat
- Overlap design
- Fast Four3 connector pin system
- Cellular core construction provides good mat rigidity and load distribution
- Stability and support for vehicles and equipment across a wide range of ground conditions
- Protect sensitive habitats
- Long life and recyclable at end of life
- Grey finish combining modern aesthetics with advanced resistance to thermal expansion
- Full suite of product accessories
