

NON-MECHANICAL EQUIPMENT

WE KNOW THE IMPORTANCE OF AVAILABILITY AND QUALITY. WE ARE COMMITTED TO DELIVERING FOR OUR CUSTOMERS EVERY TIME.

At the heart of every safe, efficient project is a reliable support system—and that's exactly what we deliver. Specialising in non-mechanical equipment, including barriers and fencing, road plates and formwork and falsework, we provide robust, tailored solutions for construction, infrastructure, and event projects of all sizes.

Our dedicated team provides a comprehensive service, including:

- Expert site survey
- Detailed quotation
- Seamless installation and dismantling of equipment

With 10 strategically placed depots across the UK, we ensure fast delivery and expert support wherever and whenever you need it. Backed by vast quantities of equipment, we're always ready to keep your project moving.

TEMPORARY BARRIERS AND FENCING

Since the 1960s, we've been committed to protecting the safety and security of the UK public. Today, we continue to innovate to meet the evolving threats of tomorrow.

We offer a huge range of barriers and fencing equipment designed to help direct and control the flow of pedestrians and traffic, and keep sites safe. With compatible accessories our barrier and fencing systems can be adapted based on your specific needs.

If you can't see what you need here or would like expert advice, please contact the team and they'll be able to talk you through options or source additional equipment for you.

TEMPORARY BARRIERS AND FENCING

Vehicle Gate

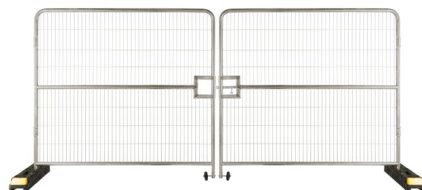

Allows vehicle access to site when linked with Heras Fencing, Mass Traffic Barriers, Speed Rated Barriers and Plastic Universal Barrier Systems.

Code: 230026

Height: 2043mm

Width: 4000mm

Weight: 40kg

Gate within Panel

1m pedestrian access gate set within 3.5m x 2m Heras Fence Panel.

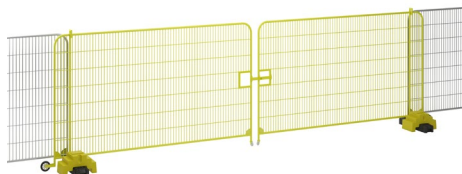

Code: 230030

Sliding Gate

Space saving 7m sliding gate system for Heras Fencing.

Code: 230228

Pedestrian Gate

The gates can link with standard Heras Fencing as well as the Mass Traffic Barrier, Speed Rated Barrier and Plastic Universal Barrier Systems to allow pedestrian access to site. Site guard fence panels can be fixed to each side using universal clamps.

Code: 230014

Height: 2122mm

Width: 1435mm

Weight: 17kg

Security Pedestrian Gate

Security digi lock system that allows restricted access with codes provided.

Code: 230043

Defender Fencing

Defender Fence is a no-dig, self-supporting system that is 100mph wind-resistant.

Unlike the traditional mesh fence, Defender Fence is virtually breach-proof and tested to destruction by the Metropolitan Police.

Code: 230222

Fence panel

2.4m x 3m

Code: 230220

Vehicle Gate

2.4m x 5m

Code: 230221

Pedestrian Gate

2.4m x 2.1m

Storm Fencing

High security self-supporting system that can withstand vandalism and is supported through rigid ballast bins.

Code: 230682

TEMPORARY BARRIERS AND FENCING

Crowd Control Barrier

Suitable for low to medium crowd control and are compatible with Pedestrian Site Access Gates.

Code: 230001

Length: 2300mm

Height: 1000mm

Powder Coated Crowd Control Barrier

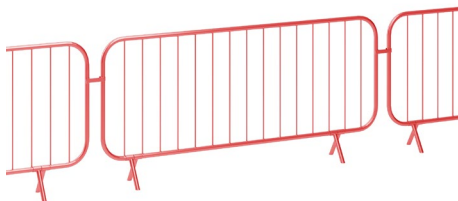

These barriers can be powder coated which involves covering with epoxy powder and heated to form a protective layer.

Code: 230008

Red or White

Code: 230008

Blue (rail specific)

Pedestrian Site Access

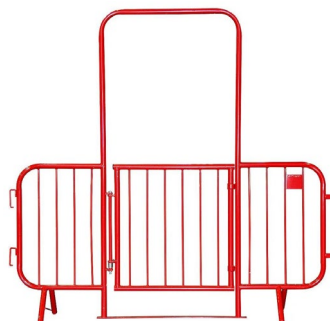

Available with or without a gate and compatible with Crowd Control Barrier Systems.

Code: 230004

Without Gate

Code: 230007

With Gate

Police Barrier

A heavy duty steel temporary barrier system, suitable for high crowd control.

Code: 230601

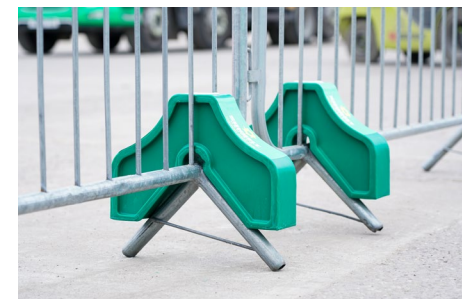

Pedestrian Block

Compatible with Crowd Control Barriers, these blocks are designed to weigh down the barriers and provide stability.

Code: 230053

15kg Red/Green

Concertina Barrier

Expandable barrier designed to set up secure perimeters in seconds.

Code: 230029

4m Yellow

Code: 230028

2m Red and White

GROUND PROTECTION AND ACCESS

We offer a wide range of product solutions for temporary access and ground protection.

From heavy-duty mats ideal for pedestrian and vehicle traffic to robust road plates designed to handle heavy loads, our products help keep your operations running smoothly whilst protecting the ground beneath.

Whether you are working on construction sites, infrastructure projects or outdoor events, our ground protection can offer -

- Load bearing performance
- Fast and easy installation
- Anti slip surfaces for improved safety

All products come with expert support to help you select the right solution for your needs.

GROUND PROTECTION AND ACCESS

EuroMats/Pedestrian Walk-Way Mats

An effective man-handleable solution to temporary access and ground protection. These heavy duty polyethylene mats can be used to protect soft ground from pedestrian traffic, vehicles and machinery.

We can also supply connectors, bolts and washers to fix mats together.

Code: 239301

Length: 2400mm

Width: 1200mm

Weight: approx. 40kg

Road Plates

Steel Road Plates are a simple solution to maintaining pedestrian and vehicle access over open trenches and other excavations.

With lifting holes in each corner and anti-skid protection.

Code: 209505 (non slip)

Length: 2400mm

Width: 1200mm

Code: 209503 (non slip)

Length: 1200mm

Width: 1200mm

Code: 209502 (standard)

Length: 2400mm

Width: 1200mm

Code: 209500 (standard)

Length: 1200mm

Width: 1200mm

LowPro Road Plates

The LowPro range is designed to replace steel plates and wooden boards. Light enough to be installed by hand, the LowPro range makes covering excavations quick, quiet and easy.

Tested to ensure a 2:1 safety factor, the LowPro range is built to last, with little to no maintenance costs and more sustainable than steel alternatives.

Code: 209015

2300 x 500mm

Pedestrian Path

Low profile surface option for pedestrian walkways, quick and easy to install with non-slip surface.

Code: 209009001

Length: 1050mm

Width: 720mm

Height: 27mm

Weight: 17kg

Grass Mat

Rubber Grass Mats are an excellent solution for preventing grass erosion and absorbing fall impact on grass or concrete surfaces

Code: 209452

1m x 1.5m x 16mm

GROUND PROTECTION AND ACCESS

SupaHoops Bike Racking

A no-dig option for temporary bicycle parking. Self-supporting and resistant to high wind. Fast and easy to install and recover.

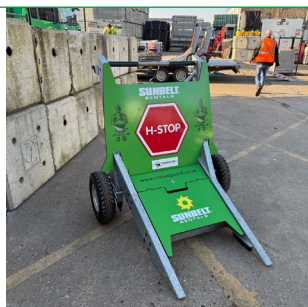

FastRack Bike Racking

Bicycle parking racks that are self-supporting and quick and simple to deploy and recover. Suitable for indoor and outdoor use.

Hussan H-Stop

High security device to protect from vehicle ramming attacks. Quick to install and easily moved to allow emergency vehicles access.

ATG Surface Guard

Offering protection against vehicle attacks and incursions for events and public realm spaces.

RB-50

A moveable, modular system for rapid, flexible and convenient deployment as a temporary vehicle barrier to protect against vehicle attacks or incursions.

ARX Stopper

The ARX Stopper is a PAS68/IWA14, CPNI and SBD accredited temporary HVM system. It can secure an average road width within 10 minutes and offers a high level of pedestrian permeability.

TRAFFIC MANAGEMENT

A range of high visibility solutions designed to direct traffic and keep pedestrians safe on roadworks, construction and building sites.

Our product offering includes quickly deployable systems which offer maximum safety, barriers that are suited to low speed traffic areas, kerb ramps providing safe access and trench covers capable of supporting pedestrian and light vehicle loads.

We provide reliable solutions to help you manage vehicle and pedestrian movement, minimise disruption during works and ensure site safety - all backed by expert advice to help you choose the right products for your needs.

TRAFFIC MANAGEMENT

Speed Rated Barrier (RB22)

Designed to offer maximum safety, the Speed Rated Barrier is one of the quickest deployable systems on the market with up to 200m per load. On impact, the barrier will bring an errant vehicle to a controlled stop.

Code: 285006

TRAFFIC MANAGEMENT

Slot Block Barrier

Each barrier set is 3500mm in length and contains 2 barriers which are designed to fit one standard temporary fencing panel. This robust plastic barrier system is designed to heighten the security around your project area. The unique design allows for temporary fencing panels to be quickly and easily fitted, whilst still conforming to the expected standards of a stable fencing system

Code: 285016
White

Code: 285015

Kerb Ramp

The kerb ramp provides safe access for wheelchair, pushchair, motorised wheelchair, bicycle and foot traffic up to 250kg. It is commonly used to provide access from kerb to road when the pavement is closed for street works.

Code: 285050
Pedestrian

Code: 285037
Vehicle

Cable Ramp

Designed for outdoor use to protect electrical cables and hose lines from damage. For use with pedestrian traffic and low volume vehicular traffic.

Code: 264650
3 Way

Code: 227520
5 Way

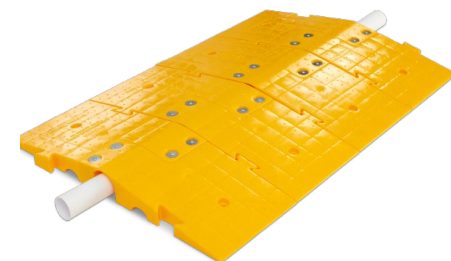

Code: 296174
Hose Ramp

Bypass Ramp

An access ramp for when pipeline is diverted above ground. 44t SWL

Code: 285686

TRENCH COVER GUIDE

Composite trench covers can be installed in the following scenarios.

- A Site Safety Risk Assessment must be carried out before installation, only install on compacted surfaces such as concrete or asphalt. Always place the trench cover centrally over the excavation.
- In some instances, road plates and trench covers must be bolted for safety, refer to the installation guide for more details.
- Trench covers can be linked together to safely cover any length of excavation.
- Trench covers have a maximum width allowance.
- The LowPro range is HAUC Compliant.
- LowPro 15/05 and LowPro 23/05 are HS20-44 load rated.
- Trench covers must be installed centrally over the trench.

LowPro Trench

Pedestrian board with patented LowPro Edge technology, suitable for the distributed load of a 1.6 tonnes vehicle over a 700mm trench.

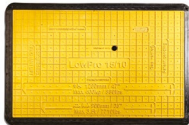

Code: 209019
Trench Cover 1.1m x 1.1m

Code: 209021

Drum Spill Pallets

Spills and contamination are a huge risk when storing oil and fuel drums, but our bunded drum pallets provide the ideal, safe way to keep these hazardous liquids on-site.

Our spill pallets are constructed from incredibly durable polyethylene, making them corrosion-resistant and suitable for use with a wide range of chemicals. An integral moulded sump holds up to 240 litres of spilled liquid, complemented by a removable plastic mesh deck that is easy to clean and maintain.

Code: 264087

Two Drum Spill Pallet

Code: 264086

Four Drum Spill Pallet

SupaSite Ramp

SupaSite Ramp is a versatile heavy-duty ramp for up to 3-tonne machines and vehicles, for use from 100mm to 300mm. Replacing bespoke timber ramps and heavy steel alternatives.

Code: 285667

Edge Protection System

The Edge Protection System has been designed, developed and manufactured in the UK and has a number of unique design features:

- Profiled edges for extra strength
- Integrated toe-boards for in-built safety
- K-Lock active safety lock feature

Dimple 'line up and lock' connection points for quick and easy installation. Sunbelt Rentals' Edge Protection System complies with European conformity standards laid out in BS EN 13374. Incorporates a system of posts and barriers, which can be fitted in a variety of applications including:

- Live edge protection
- Slab edge protection
- Debris guard barrier
- Structural steelwork protection
- Safe site walkway

Gas Cages

A unique, innovative design allows it to fold down in seconds, without removing or detaching any parts.

Benefiting from a fully galvanized heavy-duty construction (to sustain all weather conditions) with no removable parts, the folding gas cage is guaranteed to save you time and space.

Also known as a folding gas compound, this is a secure cage for storing gas cylinders (stores up to 9 x 47kg gas bottles), tools and equipment.

Strongboy

Strongboy masonry support 'locks' on to the top of the Acrow Prop and keeps it level for a more stable and secure operation.

Code: 209106

CRANE ATTACHMENTS

From boat skips and crane skips for easy muck removal, to concrete and cone-flow for those specific requirements, we have everything that suits your needs.

Our boat and crane skips have low sides for easy loading. Our concrete skips come in various sizes with expert advice on hand to make sure you make the right choice.

CRANE ATTACHMENTS

Crane Boat Skip

Boat Skips are perfect for general muck and waste removal and enable the crane operator to discharge the load automatically. These are low level for easy loading.

Minimum hire: 2 week

Code: 036124 500 Litre Capacity	Code: 036133 1500 Litre Capacity
Code: 036129 1000 Litre Capacity	Code: 036130 2000 Litre Capacity

Crane Column Concrete Skip

A Concrete Column Skip allows for storage of concrete and quick and easy discharging, with the use of an attachable tube to the bottom. To be used for pouring concrete into columns and framework that are difficult to access. Ideal for construction sites. Designed to be laid down on its side to be filled from the concrete truck.

Available in 500L and 1000L options, complete with bale arm and 200mm diameter, 3m hose.

Code: 010230 500 Litre Capacity	Code: 010245 1000 Litre Capacity
Code: 010241 1000 Litre Capacity	Geared

Crane Geared Cone Flow System

The most commonly used skip, the Coneflow Concrete Skip is ideal for big pours or areas where space is not an issue.

Operated by a wheel on the side of the skip so that the machine operator has a good view of the workforce at all times.

This skip is constructed of steel with a reinforced frame making it robust and durable enough for heavy usage.

Coneflow concrete skips are extremely versatile and enable fast and accurate concreting, they can be used in a number of different concrete laying operations such as slabs, formwork cavities, walls, columns and more.

The unique curved shape of the skip allows for better control and easy concrete flow, the angled discharge means that the skip performs well where access is limited. The skip features a laydown facility to make filling easier.

Fitted with lifting handles, the skip can also be lifted by a crane or other lifting equipment.

Code: 209226 600mm Stake/Pin

Alimats

ALIMATS® is an aluminium load spread solution for cranes and powered access. The interlocking modular mats can be carried and positioned by hand.

GROUNDWORKS

Eze Shoring

Eze Shoring is a composite trench lining system comprising of only five different components. It is lightweight and easy to assemble and there are no pins, clips, slings, pumps or hydraulics.

Code: 209780

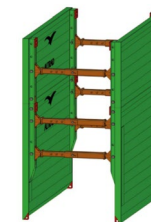

Key benefits

- 100% non-conductive for maximum safety
- All parts under 25kg for easy handling
- Adapts to various trench sizes with ease
- Tool-free setup – no pins, clips or hydraulics
- Compact enough to fit in a transit van

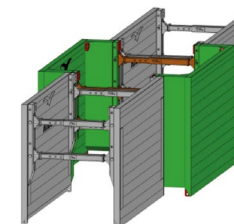

A range of products to provide temporary earth retaining support are available through our supplier partnership, subject to terms and conditions.
