

How to make trench shoring safer, lighter and faster.

Meet Eze Shore Trench Lining System.

The world's first non-metallic composite trench lining system, Eze Shore is made up of just five components, making it the safest, easiest and lightest solution for the installation of underground utilities.

Key Features

- Ultra-lightweight and quick to assemble
- 100% non-conductive for maximum safety
- Tool-free setup – no pins, clips, or hydraulics
- All parts under 25kg for easy handling
- Compact enough to fit in a transit van
- Adapts to various trench sizes with ease
- Covers depth up to 2.52m
- Protected by UK and international patents
